PROJECT EXPERIENCE

FULL STACK ECOMMERCE APP

MERN (MongoDB, Express, React.js, Node)

The app allows admins to complete CRUD (create, read, update, delete) operations on existing products, modify and remove items from a shopping cart, and conduct fully automated payments using Stripe.

https://github.com/gabriellatavares/treatyoself

REACT NATIVE WEATHER APP

Using OpenWeatherMap API and Google Places API.

Weather App with currently status and 8 forecast using user's location. Search for different cities is also available.
